

THE ARCH.

The dimensions given are approximate and for bare walls.

Height to trusses over the stage and over the seating approx 4m to 5m

Before constructing your set be sure to visit us with a tape measure and check all theatre dimensions.

Seating is fixed and cannot be removed. The seats are blue leather flip up seats with wooden arm rests.

Sections of the 'Thrust' can be moved and used as stage rises however any damage will result in new rises being built by a builder appointed by the venue.

Steps lead from the Isle to the stage so access via the Auditorium is limited but possible.

N.B. The lighting desk / bio box is not fixed so you may lose up to 9 seats if you choose to position it in the auditorium, this will make your capacity 135.

DIMENSIONS FOR THE ARCH.
