## STAGE DIMENSIONS FOR THE STUDIO. Reduced Capacity.

To The Bar

## STAGE

9.15 m WIDTH x 6.1 m DEPTH to edge of stage Truss height from floor 3.92 m

A Row - H Row, ${ }^{\text {st }}$ row of seats on the carpeted floor
9.15 m W x 7.1m $D$ to front of low deck (Cap 105)

B Row - H Row, $1^{\text {st }}$ row of seats on a riser 9.15m W x 8.1m D to Front of $1^{\text {st }}$ riser (Cap 91)

We can remove the Isle/front row seats on the floor and the second row of seats on a raised deck and take up the carpet for this area allowing a stage playing area of 9.15 m Width $x 8.1 \mathrm{~m}$ Depth. This would give you a capacity of 80 . You can add the front row of seats giving you a depth of 7.45 m but you would have people's legs to contend with over the edge of your playing space.
